

School Vaccine Collaboration

We are reaching out to coordinate an initiative between the school district and Wayne Memorial Community Health Centers (WMCHC) to provide COVID vaccinations to eligible students. The district is planning a vaccine day for students age 12 and up. We encourage all students to get vaccinated. We would welcome parents at this clinic also. We are assessing demand at this time and ask you to respond if interested.

Details of the clinic are as follows:

Which Vaccine:

- The Pfizer vaccine will be administered at the immunization clinic to be held at the high school.
- Currently Pfizer is the only vaccine authorized for 12 and older students
- No vaccine is authorized for younger students.
- Pfizer is a two dose vaccine that has been proven to be safe and effective
- See the attached fact sheet.

When:

- The Vaccine clinic day will be scheduled in the next few weeks.
- The second dose will be provided three weeks after the first dose.

Cost:

- There is no out of pocket cost for the Vaccine
- Your insurance will be billed for the of the administration of the vaccine only
- Insurances do not charge copays or deductibles
- A special fund covers uninsured patients that insures no one pays out of pocket

Process:

- We will need the attached consent for your student to be immunized.
- We would like the consents ahead of time but can accept them the day of the vaccine. We will prepare to do full registrations at point of care.
- Vaccine Clinic will be open to Parents as well as children.
