

## Act 126 - Child Abuse Training

**Act 126 of 2012** requires all public school employees, contractors, and volunteers and anyone associated in any way with public schools that has direct contact with children to receive and document three (3) hours of training on child abuse awareness every five (5) years.

To that end, the District must document for everyone involved, that the training was indeed completed and when it was completed. This record will be maintained in the District Office.

The training comes in the form of an online training course offered through the University of Pittsburgh. This online course can be accessed at <https://www.reportabusepa.pitt.edu>. Once completed, you will have the opportunity to print a certificate to submit to the District Office.
