Assistant Superintendent

ROSE E. EMMETT
Business Manager / Board Secretary

Dear Parent/Guardians,

The well pump for the water tower at our High School/Middle School campus has malfunctioned. There is currently water still in the tower and adequate pressure; however in the event the pressure or water level gets too low, we may have to utilize a flexible instructional day (FID) tomorrow for the HS/MS campus only. The elementary campuses will remain in person as this does not impact those schools. This is precautionary as we believe we should have enough water and pressure for tomorrow. Additionally, installation of a new pump will begin tomorrow and be completed this weekend. We will continue to monitor the situation and inform you as soon as possible of any alteration to the school day. If there is no further notice, school will be in-person as regularly scheduled.

Thank you.
