Good Afternoon,

Earlier, the district was made aware of an anonymous report concerning school safety at the high school. School administration, school police, and Pennsylvania State Police investigated the report and determined that it was not credible, and it was appropriate to continue normal school functions. At no time were students and staff in any danger. We will continue to be vigilant in our efforts to ensure a safe school environment and maintain effective communication. As always, the safety of our school community is our highest priority.

Sincerely,

**Matthew Barrett**  
Superintendent
