***Courses, course availability and course requirements may	_

Some content area courses may align with Industry Standards. Through these courses, students will have the option to earn certifications. Certification fees may apply.

GUIDANCE

The purpose of the Guidance Program is to help individual students throughout the school year. Since the school is preparing students to take their place in the world of work, or continued education, one major function is to assist students in selecting courses which are best suited to their needs, abilities, and interests. A computer-based guidance information program is also available in our Career Guidance Center. Information is available in the Guidance Office regarding various occupations, part-time and summer jobs, as well as the armed services.

School counselors assist students with course selections and vocational/educational planning. Counselors help students improve their study habits and counsel them regarding personal problems.

Students who need to see their school counselors must make appointments through the guidance secretary. This should not be done during class time unless it is an emergency.

PROMOTION AND GRADUATION

All students MUST select a career path each year and schedule prescribed courses within the program. Students must carry a minimum of 7 credits per year. Students are required to pass 22.5 credits to graduate.

The following courses are required:

Social Studies4 credits

/Algebra B)

Science 3 credits (one of which must be Biology)

*Students must take this course, but it is not a graduation requirement.

WEIGHTED GRADING

The Western Wayne High School has chosen to reward students for taking more challenging courses. Students who take the following courses will receive a 5% or 3% weighted grade.

Art Department

** 963 – Advanced Studio Art

English Department

**130A- English 9 Honors

**140A- American Lit. Honors

**155A- Multi-Cult. Lit. Honors

**166A- British Lit. Honors

*156- AP Eng. Lang. & Comp.

*165- AP Eng. Lit. & Comp.

Foreign Language Department

*365-AP Spanish Lang. & Cult.

*= 5% Weight **= 3% Weight

Mathematics Department

**430- Geometry Honors

**440- Algebra II Honors

**453- Statistics

**460- Calculus

*450A- AP Pre-Calculus

*465- AP Calculus

*970- AP Computer Sci. Prin.

*971- AP Computer Sci. A

Social Studies Department

**230A- Amer. Cults. I Honors

*240A- AP U.S. History

*255- AP World History

*265- AP U.S. Govt. & Politics

Science Department

**541A- Ing. Bio.w/Lab Honors

**551A- Chem. w/Lab Honors

**556A- Anat. & Phys. Honors

*563- AP Biology w/Lab

*565- AP Chemistry w/Lab

*570- AP Physics1:Alg-Based

*571- AP Physics2:Alg-Based

Technology Department

**754- Auto Tech. III

**772- Manuf. Tech. III

Note: The grade that is represented on the student's report card DOES NOT INCLUDE the attached weight of 5% or 3%. The computer program that runs our grading system will automatically add the 5% or 3% and calculate the WEIGHTED GRADE into the student's cumulative grade point average. EXAMPLE: A student who earns a "97%" in AP Government would have an additional 4.85 points (which is 5% of the grade) added to his or her quarter average. Therefore, a grade of 101.85% would be calculated into the cumulative grade point average.

Keystone Exam/State Graduation Requirements

Western Wayne School District (WWSD)

The purpose of this document is to describe the pathways available for students to meet Keystone Exam/Pennsylvania state graduation requirements as outlined in Act 158 of 2018 while adhering to federal participation requirements outlined in the amended Elementary and Secondary Education Act of 1965. These pathways apply to the graduating Class of 2023 and beyond.

Act 136 of 2020 delays the implementation of these requirements to the Class of 2023. Locally, Western Wayne School District (WWSD) still requires students to demonstrate proficiency on Keystone Exams through test scores or District established remediation and support processes. However, WWSD believes that the Act 158 pathways provide meaningful ways to meet state graduation requirements and will utilize them to complement our current process for the Class of 2023.

Typical Sequence to Meet Keystone Exam/State Graduation Requirements

Based on the typical course sequencing of high school courses, WWSD will utilize the following process to meet federal participation requirements and ensure access to all options for students to meet state graduation requirements.

- 1] Students will participate in Keystone Exams at the conclusion of trigger courses for the Algebra I, Biology and Literature Keystone Exams.
- 2] Students who pass their Algebra I course but are not proficient on the Algebra I Keystone Exam will retake the exam during the winter wave of testing while taking their Algebra II course.
- 3] At the conclusion of their sophomore year and participation in all three Keystone Exams...students, parents, school counselors and administration will determine the best course of action for individual students to meet the state graduation requirements based on five possible pathways.

Keystone Exam/State Graduation Requirements outlined in Act 158

Described below are the five pathways for meeting state graduation requirements as outlined in Act 158. This information is also located in the following links:

Act 158: PA State Graduation Requirements

PA Statewide High School Graduation Requirements

Act 158 Pathway Graphic

Students with Disabilities

A student with a disability who satisfactorily completes a special education program developed by an individualized education program (IEP) team under the Individuals with Disabilities Education Act (IDEA) and 22 Pa. Code Ch. 14 (relating to special education services and programs) that does not otherwise meet the requirements of this section shall be granted and issued a regular high school diploma by the student's school entity.

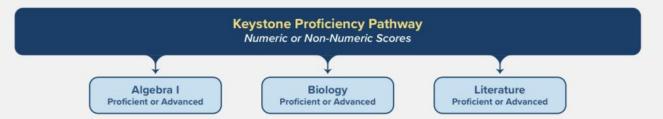

Exceptions

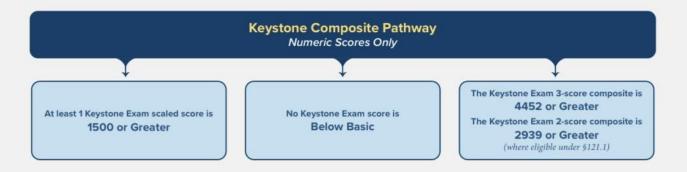

A chief school administrator may grant a waiver of the requirements for demonstrations of proficiency on the Keystone Exams or alternative graduation requirements for a student in grade 12 or to accommodate a student who experiences extenuating circumstances (e.g., serious illness, death in the student's immediate family, family emergency, frequent school transfers, or transfer from out-of-state in grade 12).

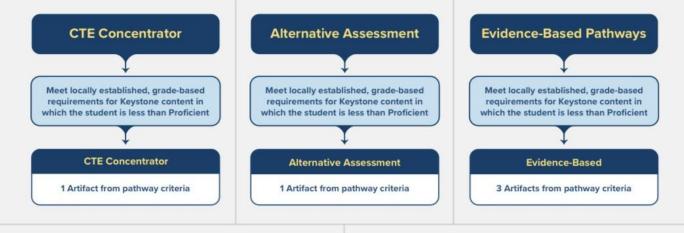

Each student granted a waiver under this subsection shall complete locally established, grade-based requirements for academic content areas associated with each Keystone Exam.

Pennsylvania Pathways to Graduation

A student in 12th grade, or experiencing extenuating circumstances, who meets locally established grade-based requirements for Keystone content area(s) in which the student is less than proficient, and is unable to satisfy the requirements of a graduation pathway may be granted a waiver by the chief

school administrator.

Waiver

Individualized Education Plan

A student with a disability who is unable to satisfy pathway requirements but who satisfactorily completes a special education program is granted a diploma under Title 22 §4.24.

NOTE: Although this infographic displays a sequential progression, students may fulfill criteria under the CTE Concentrator, Alternative Assessment, or Evidence-Based Pathways prior to demonstrating proficiency in Keystone academic content through Keystone Exam scores or locally established grade-based requirements.

Pathway Criteria

CTE Concentrator

1 Artifact

Industry-based competency certification

Likelihood of industry-based competency assessment success

Readiness for continued engagement in CTE Concentrator program of study

Alternative Assessment

1 Artifact

Attainment of one alternative assessment score or better: ACT (21), ASVAB AFQT (31), PSAT/NMSQT (970), or SAT (1010)

Attainment of Gold Level or better on ACT WorkKeys

Attainment of 3 or better on AP Exam(s) related to each Keystone content area in which less than Proficient

Attainment of 4 or better on IB Exam(s) related to each Keystone content area in which less than Proficient

Successful completion of concurrent enrollment course(s) related to each Keystone content area in which less than Proficient

Successful completion of a pre-apprenticeship program

Acceptance into accredited, non-profit Institution of Higher Education (IHE) 4yr program for college-level coursework

Evidence-Based

3 Artifacts consistent w/student goals

ONE or more from Section One No more than TWO from Section Two

Section 1

Attainment of 630 or better on any SAT Subject Test

Attainment of Silver Level or better on ACT WorkKeys

Attainment of 3 or better on any AP Exam

Attainment of 3 or better on any IB Exam

Successful completion of any concurrent enrollment or postsecondary course

Industry-recognized credentialization

Acceptance into accredited, non-profit Institution of Higher Education (IHE) for college-level coursework in an other-than-4yr program

Section 2

Attainment of Proficient or Advanced on any Keystone Exam

Successful completion of a service-learning project

Letter guaranteeing full-time employment or military enlistment

Completion of an internship, externship, or cooperative education program

Compliance with NCAA Division II academic requirements

ART DEPARTMENT.

Since our Art Department offers a variety of half-credit and full-credit courses that are designed to meet the needs and interests of all students, we encourage each student to select an art course at least once during his/her high school career.

Some courses require prerequisites. Please refer to course descriptions.

This course is intended for students studying ceramics for the first time and is a comprehensive introduction to the craft of clay working. This course is primarily a studio class, which means we will spend the majority of our time involved in the creative process (making things). In order to augment creative production and discover how the creative process works, we will also be spending time learning techniques, watching demonstrations, reading, discussing, viewing PowerPoints, and critiquing our work. (No prerequisite needed. Open to freshmen and sophomores)

[Prerequisite: **920-Introduction to Ceramics.** Open to sophomores and juniors]

- **Q25** ART FOUNDATIONS------1 CREDIT

This course is for students who are interested in learning how to draw from life experiences. Designed for first year art students, this course will cover drawing techniques in pencil, charcoal and pastel. Students will learn how to shade using highlights and shadows and use the grid method for certain projects. Other forms of art will be studied as well. There will be sketchbook assignments and independent projects along with daily in-class projects. This course is for students who love art and want to learn more. This one-credit course is a prerequisite for all other art courses, with the exception of **920-Introduction to Ceramics**.

Studio Art I will experience a continued, yet more intense, study of art. This course has been designed to help students strengthen their basic drawing skills, and further challenge them with a variety of two- and three-dimensional media. Aesthetics, art appreciation and color theory will also be studied. [Prerequisite: 935-Art Foundations]

962 STUDIO ART III ------1 CREDIT This course is designed for students who wish to continue their study of art, but do not wish to pursue art as a career. Students will complete numerous two- and three-dimensional studio pieces while developing distinct individual styles. Emphasis will be placed on developing displays for the annual art exhibit. [Prerequisites: 935-Art Foundations, 940-Studio Art I, and 950-Studio Art II] ADVANCED STUDIO ART ----- 2 CREDITS Advanced Studio Art is a college preparation course for the gifted art student who plans to pursue art as a career. The course is designed to provide students with ample opportunities to develop their creative potential in various media, as well as their understanding of visual communication and appreciation. The course work in the first semester is devoted to preparing a college entrance portfolio. During the second semester, along with continued instruction in a variety of media, each student will complete numerous two-and three-dimensional studio pieces while developing distinct individual styles. Emphasis will be placed on developing senior displays for the annual art exhibit. [Prerequisites: 935-Art Foundations, 940-Studio Art I, and 950-Studio Art II] {Summer work is required. Student must have a grade point average of 90 or higher in Art courses} WATERCOLOR PAINTING------ ½ CREDIT This course will study various techniques in watercolor painting such as flat washes, wet on wet, blended washes, and dry brushing. The students are required to take ART FOUNDATIONS before taking this course to allow the concentration to stay primarily on painting and not on drawing skills. The projects will include landscapes, portraits, and still life paintings. [Prerequisites: 935-Art Foundations. Open to sophomores, juniors, and seniors] This course will study various forms of Mixed Media through the use of collage material such as paper, felt, wood, plastic, and metal. This course will also emphasize the making of 3-D Design through additive and subtractive processes as an ongoing endeavor, involving the student in informed critical and creative decision making. The students will learn how to incorporate photo transfers and photo lifts into their artwork. Issues of craftsmanship as well as narrative and formal content will be addressed. Students will be encouraged to investigate and experiment the physical and aesthetic possibilities and limitations of a range of media and materials. Sculptural issues will be explored through the solution of design problems. This course will also include the study of famous mixed media artists. [Prerequisites: 935-Art Foundations. Open to sophomores, juniors, and seniors] **DIGITAL PHOTOGRPAHY I ------** ½ CREDIT In this course, students will learn the basics of photography as you capture moments and create visual stories. Students will acquire a strong understanding of light as they manipulate the camera to create their imagery. Post-editing opportunities will be explored as students reach their desired photographic results. Students will walk away from this course with a comprehensive portfolio of studio work. A digital SLR camera with a lens is a requirement for this course. This is a fine art photography course so the digital SLR camera is a critical piece of equipment. Students cannot take the course simply with the use of a phone or tablet. This intermediate level course is designed to expand the knowledge and abilities of motivated students who have completed 955-Digital Photography I. Basic photographic and post-process skills learned in 955 will be refined as students work with Adobe Lightroom and Photoshop as they develop a personal photographic vision. Each student will be challenged visually and intellectually as they explore several major photographic themes. The class includes detailed demonstrations, hands-on exercises, and constructive critiques. Students will continue adding unique photographs to their on-going portfolio. Students

entering the course must have a digital camera with aperture and shutter priority. Students are also responsible for a digital

storage device such as a flash drive. [Prerequisite: 955-Digital Photography I]

-- BUSINESS DEPARTMENT-

In today's world, technology is everywhere and affects everyone. Therefore, the business curriculum offers a variety of courses which enable students to get a job and/or to become better prepared to survive as consumers and citizens.

640 COMPUTER APPLICATIONS-MICROSOFT WORD/KEYBOARDING------ 1 CREDIT

Proper keyboarding technique has become an invaluable skill in the workforce today. In this course, students will learn touch-typing in order to improve upon their existing typing skills. This course also provides students the opportunity to learn a variety of concepts using Microsoft Word. Using Word, students will learn to format a variety of business documents as well as develop a deeper understanding of digital computer file management. With the skills students master in this course, they will become faster and more confident at the keyboard and on the computer. [Student proficiency may lead to software certification.]

1 CREDIT This is an introductory course which allows for discovering how a business works and how it impacts life on a daily basis. Introduction to Business familiarizes students to the world of business and assists in preparing them for the economic roles of consumers, workers, and citizens. The course provides instruction in business concepts and skills students need in today's competitive environment. Business concepts such as finance, marketing, and

for the economic roles of consumers, workers, and citizens. The course provides instruction in business concepts and skills students need in today's competitive environment. Business concepts such as finance, marketing, and operations and management are covered. Students will also gain valuable information and skills for the workplace.

At the conclusion of this course, interested students will be able to take the Microsoft Specialist (MOS) certification test (Basic level). This is a test recognized internationally by employers. This course is required for all students enrolled in the Office Management sequence of the Business & Technology career pathway. (Open to all grades)

- Accounting I, as a one-year course for 10th, 11th, and 12th grade students, offers students an opportunity to learn the language of business, analyze business transactions, maintain journals and ledgers, and prepare financial reports. Students will also have the opportunity to learn about several aspects of personal financial planning. [Students may earn college credit through arrangements with Lackawanna College] (Accounting I can serve as a math credit as long as it is beyond the minimum 3 credit math requirement.)

655	MARKETING
657	SPORTS & ENTERTAINMENT MARKETING
659	FASHION MARKETING
661	ACCOUNTING II
664	BUSINESS COMMUNICATIONS & PROCEDURES

-- ENGISH DEPARTMENT---

The English Department offers a varied program in all areas of communication skills, with special attention to research, writing skills, and literature. Course content focuses on research and problem-solving skills. Four credits of English are required for graduation.

130 ENGLISH 9------1 CREDIT

A literature-based course, English 9 introduces students to various literary genres typically required by colleges. Students will learn the basics of research, including library usage techniques, note-taking, outlining, use of technology in research, alternative research strategies, and writing in accordance with the writing process. Students will experience various genres of classical and contemporary literature. They will complete applicable group activities and individual projects. In addition to narrative, persuasive, and expository writing, each student will be expected to write a serious, in-depth research report. The course will include reading instruction, study skills and vocabulary/grammar review as needed.

ENGLISH 9 HONORS-----1 CREDIT

A literature-based course, English 9 Honors introduces students to various literary genres typically required by colleges. Student will read various genres of classical and contemporary literature with a strong focus on literary analysis. Students will learn and apply the research skills by completing at least one formal research paper. Writing skills will be sharpened through students' compositions. Summer reading and writing assignments are required. Enrollment will be based on teacher recommendation and the student should have earned at least a 90% in 8th Grade Language Arts.

140 AMERICAN LITERATURE ------1 CREDIT

The course is designed to improve students' reading comprehension and analytical skills through exploration of American texts and writers with consideration of U.S. history and culture. Students will discuss and write about literature and display an understanding of the application of literary elements. Students will continue to develop writing process techniques. This course prepares students to take the Keystone Literature exam.

AMERICAN LITERATURE HONORS ------1 CREDIT

Students will analyze literary themes and elements with a correlation to American history and culture. Students will read various genres of classical and contemporary literature with a strong focus on literary analysis. Writing skills will be sharpened through students' compositions. Summer reading, written analysis, and other assessments are required. This course also prepares students to take the Keystone Literature exam. Enrollment will be based on teacher recommendation and the student should have earned at least a 90% in English 9. [Prerequisite: 130A-English 9 Honors or **130-English 9**].

ENGLISH AS A SECOND LANGUAGE------ 1 CREDIT

The purpose of this course is to provide students whose primary language is not English with support in content-area classes and English instruction, when deemed necessary by the student's entry-level skills in English. Instruction will be administered in group and individual settings at a time determined by classroom availability and time constraints. Students will be evaluated by their progress in oral and written communication, as well as progress in their content-area classes.

This course is a rich mix of classic, contemporary and multicultural literature that explores a range of ideas and experiences. It presents students with opportunities to analyze and interpret written works. The process of literacy is stressed. Literary study through written and spoken responses will help students develop strong reading/writing and public speaking skills. Students will complete a career research paper or public speaking project. Students will complete the college/personal essay. (Open to juniors)

- This course will focus on expressive writing in many different forms. Students will have the opportunity to explore several different types of poetry and prose styles, as well as responding to literature, art mediums, quotes, and music. Originality and writing that shows thought will be emphasized. Strategies to avoid writer's block and new ways to uncover ideas for writing will be studied. Peer reviews and sharing ideas are essential elements to this course. Students will explore and create different types of writing that express creativity. [Open to grades 9-12]

· FAMILY AND GONSUMER SCIENCE DEPARTMENT•

Family and Consumer Science courses will introduce our students to a gainful and useful background in various aspects of life, including the physical, social, and economical aspects of everyday living.

through lifetime nutrition, exercise choice and disease prevention. The course is a personal reflection of their current health practices with further education on future change. This class is taught as an applied science with both lecture, labs, and taste testing formats. The student will be analyzingtheir diets, evaluating nutrition claims and research, developing meal plans based on macro and micronutrients, exploring nutrients and how it affects the body, and creating an educational campaign for Nutrition month. The class is helpful for students pursuing a degree in the medical, athletic, or culinary field. This is not a cooking class but cooking labs and taste testing **are done weekly**. [Pre-requisite: Honors or AP Science class] Students will identify their skills, abilities, goals, and interests in preparation for further education and career choice. Career education and work standards in the areas of career awareness, preparation, acquisition, retention, advancement, and entrepreneurship are the focus. Additionally, the class will cover financial literacy and money management. Primarily taught using computer-based learning programs; SMARTFUTURES AND EVERFI, providing the student the necessary applications for making informed career decisions and enhancing financial understanding and responsibility within each specified module. Teacher created extension activities and cumulative projects are utilized throughout the course in addition to computer learning. (Required in Grade 10)

833	INTRODUCTION TO SEWING1 CREDIT
033	This is an introductory course designed to provide a more in depth look at sewing and expose students to the textile/fashion industry. Students will learn hand sewing techniques, pattern reading, equipment and sewing terminology and gain a deep understanding of the sewing machine. Projects will involve basic sewing skills, crafting, quilting, and visual merchandising. (Open to Grades 9-12)
843	TEXTILE AND DESIGN
863	FASHION EXPLORATION
864	CREATIVE CONSTRUCTION

The Foreign Language Department strives to instill in each student an appreciation for and awareness of the language, history, mores, and customs of other countries.

- At this level, students are introduced to the basic elements of French as they move through the early stages of language acquisition. They study major vocabulary categories, verb tenses, and other fundamental components of French grammar. The main purpose is to help students communicate in French at a basic level, appreciate the French-speaking world, and develop cultural awareness. This course is an on-line class offered during the school day. imaginative structural drills, and increased reading and writing materials. Students are also introduced to the culture and geography of Spain and Latin America. Spanish culture in the United States is emphasized. GERMAN I – Western Wayne Virtual Academy ------1 CREDIT language acquisition. They study major vocabulary categories, verb tenses, and other fundamental components of German grammar. The main purpose is to help students communicate in German at a basic level, appreciate the German-speaking world, and develop cultural awareness. This course is an on-line class offered during the school day. 333 GERMAN II - Western Wayne Virtual Academy------1 CREDIT
 At this level, students review the basic alaments of Carrotte Students review the basic alaments review the students review the basic alaments review the students review the st At this level, students review the basic elements of German grammar acquired in German I and expand their communicative abilities. They advance their knowledge of German grammar and learn additional vocabulary. Their language skills increase to the point where they can participate more fully in general conversations, read more sophisticated passages, and write with a firmer command of syntactical structures. Cultural awareness is further developed. This course is an on-line class offered during the school day. [Prerequisite: 330-German \mathbf{I} FRENCH II- Western Wayne Virtual Academy ------1 CREDIT At this level, students review the basic elements of French grammar acquired in French I and expand their communicative abilities. They advance their knowledge of French grammar and learn additional vocabulary. Their language skills increase to the point where they can participate more fully in general conversations, read more sophisticated passages, and write with a firmer command of syntactical structures. Cultural awareness is further developed. This course is an on-line class offered during the school day. [Prerequisite: 330-French I] language. The concepts which are utilized allow the student to converse at the level of an elementary age native speaker. Slang terms and practical idiomatic expressions challenge English speaking students who are learning Spanish as a second language and Eres Tu' Maria Video Series. Eres Tu' Maria provides a motivating experience with Spanish using a storyline. Students will improve listening and reading comprehension as a result of watching and completing the correlating activities. Periodic discussions of the history, culture, and literature of Spain, Mexico, and Latin America are also presented. [Prerequisite: 331-Spanish I] Spanish III is a course in refinement of oral language skills and the introduction of written and grammatical
 - 25

recommendation.]

language skills by using a variety of short dialogues, stories, and histories to increase the student's vocabulary, confidence, and writing ability. Students will be able to speak, read, write, and interpret Spanish in multiple tenses by the end of this course. [Prerequisite: **341-Spanish II** with an average of 80% or above or teacher

Success in a high school mathematics course requires, among other factors, a proficiency in basic math, and the proper background in mathematical concepts. Many of the courses offered build upon previously-learned material and, therefore, have one or more prerequisites.

A student who wants to take more than one mathematics credit in a year is urged to discuss the possibilities with his or her guidance counselor and mathematics teacher.

Three (3) credits in mathematics are required for graduation. Accounting I & II cannot be used for these 3 credits. Accounting I and II will be counted as additional math credits beyond the required 3 for graduation.

112	APPLIED GEOMETRY 1 CREDIT
443	Geometry enables students to acquire information about geometric figures using intuition, deductive and inductive thinking, formal proofs, constructions, and Algebra. Included is a thorough study of 5 Big Ideas: angle pairs, triangles, quadrilaterals, surface area and volume. [Prerequisites: Algebra A , Algebra B , and teacher recommendation]
450	PRE-CALCULUS
450A	ADVANCED PLACEMENT PRE-CALCULUS
451	ALGEBRA II

975	COMPUTER PROGRAMMING I
976	COMPUTER PROGRAMMING II
977	COMPUTER PROGRAMMING III
978	COMPUTER PROGRAMMING IV ———————————————————————————————————
981	SAT PREP MATH

The Music Department offers several exciting performing groups. Special ensembles such as Jazz Band, Select Chorus, and others will be offered to members of the ensemble classes Band and Chorus. All instrumental ensembles are outgrowths of the basic course in playing techniques called Band. All vocal ensembles are outgrowths of the basic course in vocal technique called Chorus. Anyone considering a career in the musical arts should take both instrumental and vocal training.

925 BAND------1 CREDIT

The Band program at Western Wayne has come to be known as one of the finest in Northeast Pennsylvania, having great success over the last 25 years.

Within the Band program there are multiple ensembles such as Concert Band, Marching Band ("The PRIDE of Western Wayne"), Jazz Band, Brass and Woodwind Ensembles. **Band Class** is the backbone of the instrumental music program and rehearses during the scheduled **Band** period. All students in **Band** class are automatically accepted as members of the Concert and Marching Bands. Selection to Jazz Band, Brass and Woodwind Ensembles and other special performing groups will be established by the Band Director.

The Band performs in two formal concerts annually. These are traditionally a holiday concert and a spring concert. The Band also performs for special school functions, such as assemblies, graduation and pep rallies. The Band performs at football games and in parades, cavalcades and community events. Transportation costs associated with all away football games and up to 5 (five) community events will be the responsibility of the District; travel costs for other band events is subject to transportation funding rules, whatever they may be at the time. An annual schedule of performances will be provided to students and their families on the WWBAND Google Classroom and in print if requested. Additional performances may be added during the year but students will be given notice of performances well in advance or they will not be expected to perform.

Performance and Rehearsal Schedule and Requirements for Band Class.

- 1. The marching band will rehearse after school one day a week and also the day of any Friday football game. All rehearsals are considered part of the class participation grade. WW Varsity Sports students will be excused from these rehearsals early to allow students to participate in both the Band and sports.
- 2. All performances are graded and will be treated as tests. As such, a student will have the opportunity to make up any missed performance by completion of a test or assignment assigned by the band director. This make up will only be offered if the absence is excusable by school attendance policy.
- 927 Students planning a career in music are encouraged to take chorus. Chorus provides an opportunity to sing without the pressure of performing alone. Students will work as a group to develop Vocal Music for various performances. Advanced vocalist that enjoy to compete, are encouraged to audition for PMEA festivals where qualifying students have an opportunity to perform with various students from other school districts.

<u>Performance Requirements</u> The Chorus will perform in two formal concerts annually, a traditional holiday performance and a spring performance. Other performance opportunities include small ensembles, vocal solo work (student choice), as well as special school functions and community services.

<u>Concert Attire</u> The attire for the chorus is a formal attire of black and white. Solid White Dress Shirt with a Collar & Sleeves, Solid Black Pants/Skirt (Skirts should fall between the ankle & knee or floor length), and Solid Black Shoes

- 1. Intermediate acting, movement, and vocal techniques
- 2. History of the theater and its cultural purposes
- 3. Anatomy of a production
- 4. Understanding of theater as students will explore basic acting skills including pantomime and improvisation, create and perform plays, and critique performances.

The purpose of this year long, repeatable course is to give the student an increased appreciation of an additional experience in theater as an art form. Students taking the course for a 2nd, 3rd, or 4th year will review previous aspects of theater arts and will be offered more intensive and highly individualized instruction in acting, with rigorous, performance-oriented training in singing and acting techniques, with a secondary emphasis on dance. Students continuing training in theater arts will also be offered a study of stage technology and theatrical design. This course has been crafted for the beginning theater art student or the student who is seriously interested in pursuing the theatrical arts as a major or minor at the university level. (Open to all)

<u>Performance Requirements</u> – Students are required to perform in a formal theatrical production during the school year. (School Production or Community Production)

- $931_{\rm This\ is\ an\ introductory\ course\ for\ students\ interested\ in\ the\ technical\ aspect\ of\ theater.\ Units\ of\ study\ include:}$ Safety, Professionalism, Theater Electricity, Lighting Design, Sound Design, and Basics of Theater. This course requires after school hours as part of the student's grade. Students who elect this course will be required to work the spring musical. (Open to students in grades 9, 10, 11, and 12 with teacher approval)
- Music Theory I is offered to all students with basic music skills. This course will explore the foundational elements for writing music, including but not limited to: Music Notation, Music Terms, ear training/dictation, sight singing, improvisation, and composition. [Experience on an instrument or voice, as well as, basic notereading skills are required.]
- MUSIC THEORY II ------ 1/2 CREDIT Music Theory II is offered to all students who have completed Music Theory I or who have passed a proficiency exam with the teacher. This class will explore advanced written music notation, music terms, scale structure, ear training/dictation, sign singing, and composition. [Experience on an instrument or voice, as well as, basic notereading skills are required.] [Prerequisite: **971-Music Theory I** or teacher permission]
- Music Theory III is offered to all students who have completed Music Theory II or who have passed a proficiency exam with the teacher. This course will explore advanced written harmony, keyboard harmony, ear training/dictation, sight singing, Chord Structure, music forms and composition. All students will be required to write an arrangement suitable for performance. [Experience on an instrument or voice, as well as, basic notereading skills are required.] [Prerequisite: **971-Music Theory II** or teacher permission]

- PHYS CALEDICATION DEPORTMENT.

The objective of the Physical Education curriculum is to provide the student with skills and knowledge for active participation in and enjoyment of physical activity. We believe that physical education should prepare our students for a healthy lifestyle with the knowledge of wellness, fitness, and physical activity. Our program emphasizes an understanding of the reasons why it is physiologically important to maintain a healthy body. Activities include team sports, lifetime sports, rhythmic, and personal fitness.

40	BOYS 9 GYM/GIRLS 9 GYM

	BOYS 12 GYM/GIRLS 12 GYM

HEALTH EDUCATION ------ 1/2 CREDIT

Health education is the process by which individuals and groups of people learn to behave in a manner that is conducive to the promotion, maintenance, and restoration of health. The health education course is designed to supplement and enhance previously learned health knowledge. Through a conceptual approach, the students will be provided with a wide scope of general health and health related issues. The health education field is ever changing. It is very important for students to be aware of the most current health trends and issues. Several class periods throughout the school year will be devoted to current health topics.

Areas to be studied throughout the school year include:

- First Aid and CPR
- Non-communicable Diseases
- Nutrition and Digestive System
- Reproductive Health
- Communicable Diseases

CPR Certification:

All health education students will have the opportunity to earn their adult, child and infant CPR certification through The American Safety and Health Institute (ASHI). ASHI is an association of professional safety and health educators providing nationally recognized training program across the United States and in several foreign countries. ASHI's mission is to continually improve safety and health education by promoting high standards for members, principles of sound research for curriculum development, and the professional development of safety and health instructors worldwide.

The Western Wayne School District has an agreement with the local fire companies to provide elective credit for the following courses sponsored by the fire companies:

- 1. Firefighting I
- Emergency Medical Technician 2.

The following criteria must be met for this elective credit to be awarded:

- Proof of membership in the fire company
- 2. Description of their course
- 3. Number of hours of instruction
- Copy of certificate of completion 4.

Upon receipt of this information, one elective credit per course will be entered on the student's transcript with and indication of a "P" (passing) grade. This grade will not be part of the computed grade point average.

SGENGE DEPARTMENT-

The science courses described below have been designed to meet the needs of a diverse student population – college-bound, career-bound, or domestic-bound. Students should be able to find success in one of the career paths available to them. Outstanding student performance can be converted to college credit through an Advanced Placement Chemistry, Advanced Placement Biology, or Advanced Placement Physics course.

- This course is designed to provide an opportunity to investigate areas of ecological and environmental sciences, as well as biochemistry and how they are an integral part of everyday life. We will investigate the composition, diversity and how living things are connected to earth. The fundamental concept of evolution will lead to investigations into explorations of the living world, the physical environment, and the interactions that occur in and between ecosystems. Biochemistry will involve the study of the molecular composition of living cells, the organization of biological molecules within the cell, and the structure and function of these biological molecules. Students will engage in investigations to understand and explain the behavior of living things in a variety of scenarios that incorporate scientific reasoning, analysis, communication skills and real-world applications.
- This course covers the topics presented in biology at a faster pace and in more detail. The lecture portion of the class will cover topics such as ecology, biochemistry, cell biology, photosynthesis and respiration, molecular and Mendelian genetics, evolution, and diversity of life. Laboratory classes are designed to stimulate student interest and encourage problem solving and discovery. This course is designed for highly motivated academic students of exceptional ability who have a strong interest in science and are willing to investigate biology at a deeper level. Students wishing to take 563-AP Biology must take this course. Summer work is required. [Prerequisites: Successful completion of 431-Algebra I (may be taken simultaneously). Proficient or Advanced on the 8th Grade Science PSSA and Reading PSSA or successful completion of General Science 9 with a grade of 90% or better.]

This is a first-year course in modern chemistry designed to provide the student with basic knowledge of concepts including atomic structure, quantum mechanics, bonding, behavior of gases, chemical reactions, and an understanding of the "mole" concept. This course has a strong emphasis on the application of mathematical concepts in a scientific setting. Students will learn how to utilize the scientific method coupled with dimensional analysis to solve scientific problems. At the end of the course, students should be creative and competent problem solvers. [Prerequisite: 431-Algebra I, 441-Geometry or 430-Geometry Honors (may be taken simultaneously), 541-Inquiry Biology w/Lab, 541A-Inquiry Biology w/Lab Honors, or 542-Applied Biology, with a grade of 85% or better; 541A-Inquiry Biology w/Lab Honors, or 541-Inquiry Biology w/Lab may be taken simultaneously]

This is a rigorous, fast-paced course designed for highly motivated students with a strong interest in the math and sciences. This course provides students with in-depth detail of such concepts as matter, atomic structure, quantum mechanics, bonding theory, chemical equations, the periodic table, nomenclature, and the "mole concept". This class will challenge the student with process and inquiry skills inherent in the study of science. This class will include lecture, as well as, a hands-on laboratory component. Students will be required to maintain a scientific notebook. Students wishing to take 565-AP Chemistry must take this course. Summer work will be required. [Prerequisites: Successful completion of 421-Algebra I, with a minimum of 85% or better, 441-Geometry or 430-Geometry Honors (may be taken simultaneously); 541-Inquiry Biology w/Lab or 541A-Inquiry Biology w/Lab Honors may be taken simultaneously. Students must pass the Biology Keystone Exam and the Algebra Keystone exam if they have taken these courses.]

- The Advanced Placement Biology course is designed to be the equivalent of a two-semester college introductory biology course. Topics covered include in-depth review of cell anatomy and physiology, mitosis and meiosis, cellular energetics, heredity and molecular genetics, the anatomy and physiology of plants and animals, and ecology. Primary emphasis is given to developing an understanding of concepts rather than memorizing terms and technical details. Summer work is required. You must have an 85% or higher in this course to be eligible to take the AP exam. [The course is designed for college-bound students planning to major in any of the biological sciences. Prerequisites: 431-Algebra I; 541A-Inquiry Biology w/Lab Honors and teacher recommendation; 556-Anatomy & Physiology w/Lab is recommended but not required. It will help with preparation for the AP exam. Students must pass the Biology Keystone Exam and the Algebra Keystone Exam.]
- Advanced Placement Chemistry is a second-year course in chemistry, designed to provide an opportunity for high school students to receive credit for college-level coursework while still in high school. Topics include structure of matter, kinetic theory of gases, chemical equilibria, chemical kinetics, acid/base chemistry including buffer solutions, electrochemistry, and the basic concept of thermodynamics. Lecture and laboratory work are key components of this college run curriculum. A strong background in math is highly recommended due to the intensive mathematical problems inherent in chemistry concepts. Students are expected to be independent learners and may need to complete subject matter outside of the classroom. Students will be required to maintain a scientific notebook. This course is designed for the college-bound student with a strong interest in science. Summer work is required. You must have an 85% or higher in this course to be eligible to take the AP exam. [Prerequisites: A grade of 90% or better in 431-Algebra I and 441-Geometry or 430-Geometry Honors, 551A-Chemistry w/Lab Honors. Students must pass the Biology Keystone Exam and the Algebra Keystone Exam.]
- This is an independent study course in which students are responsible for laboratory preparations. Students will need knowledge of basic chemistry and will need to be able to implement all laboratory safety rules. A thorough chemistry vocabulary and understanding of chemical concepts are required. Students will be required to tutor chemistry with lab students, prepare different solutions of varying concentrations, and identify and locate different glassware and equipment. Students will be responsible for all aspects of laboratory preparations, including safety and proper clean-up. Students will need to be responsible, self-motivated, and be able to follow written instruction. Special projects for community outreach could be part of their tasks. [Prerequisites: 551-Chemistry w/Lab or 551A-Chemistry w/Lab Honors with a minimum grade of 85%; Chemistry teacher approval required. Students must score Proficient or Advanced on the Biology Keystone Exam. Students may be asked to complete an independent research project.]

- This is an independent study course in which students are responsible for laboratory preparations. Students will need a basic knowledge of biological and ecological concepts and be able to implement all laboratory safety rules. Students may be required to tutor General Science and General Keystone Science students, prepare labs, and identify and locate all laboratory equipment. Students will need to be responsible, self-motivated and be able to follow written instruction. [Prerequisites: General Science Teacher approval. Completion of 531 General Science with a grade of 85% or higher. Students may be asked to complete an independent research project.]

SOCIAL STUDIES DEPARTMENT

The Social Studies Department offers a multi-cultural program in all areas of social studies including history, political science, economics, psychology, and geography. Four credits of Social Studies are required for graduation. Students are expected to become proficient in critical thinking and analysis, and to develop a better understanding of the world around

the 1800s. In-depth studies are conducted on important historical concepts, economic foundations, and causeeffect relationships, so that the student will better understand the complexities of historical events. The geography of the Western Hemisphere is also incorporated, as it affects the living patterns of those who live there.

the 1800s. In-depth studies are conducted on important historical concepts, economic foundations, and causeeffect relationships, so that the student will better understand the complexities of historical events. The geography of the Western Hemisphere is also incorporated, as it affects the living patterns of those who live there. This course has an emphasis on writing and primary source analysis at an accelerated pace and will prepare students for the AP US History class. [Prerequisite: Social Studies teacher recommendation and grades will be considered for admission. Summer reading will be assigned.

The course begins in the 20th Century, and continues to the present, with emphasis on the social, political, and economic history of our country. The course includes a study of the rise of big business, the growth of big cities, and organization of labor; then the rise of America as a world power with the Spanish-American War and World War I. The prosperity of the 20's, the Depression, and Roosevelt's New Deal are studied with world problems, leading up to World War II. The national and international problems after World War II are considered, concluding with the present-day conditions in America. [Prerequisite: 230–American Cultures II]

ADVANCED PLACEMENT US HISTORY ------ 1 CREDIT

The course begins in the 20th Century, and continues to the present, with emphasis on the social, political, and economic history of our country. The course includes a study of the rise of big business, the growth of big cities, and organization of labor; then the rise of America as a world power with the Spanish-American War and World War I. The prosperity of the 20's, the Depression, and Roosevelt's New Deal are studied with world problems, leading up to World War II. The national and international problems after World War II are considered, concluding with the present-day conditions in America. This course has an emphasis on writing and primary source analysis at an accelerated pace. Social Studies teacher recommendation and grades will be considered for admission. Summer reading will be assigned.

will be upon topics such as: the Italian Renaissance, Reformation, scientific revolutions, European monarchies, French Revolution, Asian empires, Russian revolutions, British Empire, South American independence movements, imperialism in Africa, African independence, Asian governments and change, Vietnam War, and the modern U.S.

- 265 ADVANCED PLACEMENT UNITED STATES GOVERNMENT & POLITICS ------- 1 CREDIT This one credit course is designed for senior Advanced Placement students seeking college credit in the area of United States government. Emphasis is placed on an intensive investigation and thorough understanding of the functioning of our national government, its constitutional foundations, civil liberties and civil rights, as well as the role of political parties and interests groups in our society. Students may take the AP United States Government and Politics exam. [Prerequisite: Social Studies Department recommendation. Required summer work will be assigned.]

TECHNOLOGY & ENGINEERING DEPARTMENT ----

Technology and engineering courses are available to all students on an elective basis. The courses are designed to allow the student to investigate the various areas in STEAM (Science, Technology, Engineering, Arts and Mathematics) along with the industrial field with experiences in woodworking, metalworking, graphic processes, building trades, computer-aided drafting, engineering, video production, electrical concepts, robotics, computer-aided machining, and auto mechanics. This includes core academic concepts and computer experiences relative to the trade area throughout the curriculum. The department suggests that students planning careers in this area should follow the career pathways outlined in this book. Students interested in the engineering fields of study, should follow the engineering pathway recommendation(s) along with high level math and science courses including physics and statistics. If students fail a particular course, students will be required to take a year out of that area and reconsider their options.

- This course is designed to provide a survey of topics that are part of the Manufacturing Technologies Career Pathway. Ideally, participation in this course is intended for students who wish obtain employment in the Manufacturing Technologies fields of welding technology, machinist/machine tool technology, electronic engineering, communications engineering, electromechanical technology, drafting and design technologies, and additive manufacturing. (Open to Grade 9)
- This two-credit course is intended to provide theoretical and practical knowledge and skills of drafting and design, logistics, materials & supply chain management, and engineering technologies. The progression of the course will prepare students to obtain several credentials. Topics covered include introduction to drafting and design, geometric construction, freehand drawing and sketching, introduction to engineering math, introduction to mechanical drawing and design, dimensioning, introduction to architecture, introduction to civil drafting, introduction to electronic drafting, CAD, ergonomics, inventory management, procurement operations, receiving, storage and put-away, order fulfillment, packing, shipping and transportation, management, economics, knowledge of engineering, ethics of engineering, teamwork, engineering graphics, engineering problem solving and design process, modeling, manufacturing and industrial systems, manufacturing processes, CAM, power and energy, mechanical advantage and mechanisms, fluid power systems, green energy, machine controls and automated systems, properties of materials, statics and dynamics,, kinematics, total quality control, and precision measurement for industry. This class is open to students who are enrolled in the Manufacturing Technology Career Pathway. (Open to Grade 10)
- This two-credit course is intended to provide theoretical and practical knowledge and skills of electromechanical technician and electronic engineering. The progression of the course will prepare students to obtain several credentials. Topics covered include safety, basic electricity, electrical reporting, electronic systems measurement, National Electrical Code, electrical resistance, DC motors, basic logic functions, Programmable Logic Controllers', robotics, electrical quantities and components, instrumentation, Ohm's Law/power, series circuits, parallel circuits, series-parallel circuits, alternating current, oscilloscope, inductance, inductive reactance, RI circuits, AC current, transformers, capacitance, capacitive reactance, RC circuits, resistor-inductor-capacitor circuits, resonance, soldering, resoldering, diodes, power supplies, transistor characteristics, small signal amplifiers, operational amplifiers, basic digital electronics, troubleshooting, electronic communications, motors, microcontrollers, and history of electronics. This class is open to students who are enrolled in the **Manufacturing Technology Career Pathway**. (Open to Grade 12)

7 / CONSTRUCTION TRADES 1 CREDIT
745 CONSTRUCTION TRADES
720 VEHICLE MAINTENANCE
This half credit course is intended for general introduction to the knowledge and skills in the areas or vehicle systems, measurement, trade related mathematics, tools, engines, and parts. This course is available to any 9, 10, 11, or 12 grade students to fulfill an elective credit.
700 METAL TECHNOLOGIES1 CREDIT

Western Wayne School District is an equal opportunity educational institution and will not discriminate on the basis of race, color, national origin, sex, and handicap in its activities, programs, or employment practices as required by Title VI, Title IX, and Section 504.

What are Career Clusters?

The sixteen Career Clusters were developed to relate occupations to broad industries. Within each cluster are several "pathways," which provide a more focused category within the cluster. These are useful to educators, industry groups, employers, parents, and others. Some occupations will occur in more than one cluster or pathway.

Career Clusters prepare all students for colleges and careers.

Educators helping students learn career management skills can encourage students to explore a range of career options by focusing attention on broad areas (clusters or pathways), rather than specific occupations. Since each cluster includes occupations with a range of skill and training requirements, students can concentrate on groups of occupations most suitable to their individual needs.

Skills and knowledge required for the occupations in each cluster have been identified. This information can be used by educators to help ensure that students are acquiring the qualifications they need for employment and by industry groups and employers to help structure job descriptions and employee training programs. Parents can use cluster information to learn about qualifications and training and to help their children explore career possibilities.

For more information on Career Clusters, visit the States' Career Clusters web site at:

https://careertech.org/career-clusters/

16 USDOE Career Clusters - Brief Descriptions

	_
riculture, Food & Natural Resources	The production, processing, marketing, distribution, financing, and development of agricultural commodities and resources including food, fiber, wood products, natural resources, horticulture, and other plant and animal products/resources.
Anhitecture & Construction	Careers in designing, planning, managing, building and maintaining the built environment.
ts, A/V Technology & Communications	Designing, producing, exhibiting, performing, writing, and publishing multimedia content including visual and performing arts and design, journalism, and entertainment services.
iness, Management & Administration	Business Management and Administration careers encompass planning, organizing, directing and evaluating business functions essential to efficient and productive business operations.
